

## Homework 0

1. Please watch these two YouTube videos before Monday's class. The links are: <https://www.youtube.com/watch?v=hrTQipWp6co> (37 minutes) and <https://www.youtube.com/watch?v=RGQj5yH7evk> (68 minutes). The first video focus more on Git and the second talks about both Git and GitHub. There are some redundant topics, but it is good to get a couple perspectives. Feel free to scrub through the videos or watch at faster speeds if you are already quite familiar with Git and GitHub. Also, for the second video, you can skip the part on SSH keys (20:30 through 25:27).

Note that GitHub was updated and the primary branch is now called "main" not "master", so any time you see commands with "master" in them, you'd use "main".

2. Write 2-3 paragraphs that summarizes the first video including important Git commands that were introduced.
3. Write 2-3 paragraphs that summarizes the second video including important Git commands that were introduced (that you did not already mention in for the first video).
4. Submit your summaries to the Homework 0 Assignment on Canvas.
